! Should Fix:

Enable compression

Compressing resources with gzip or deflate can reduce the number of bytes sent over the network.

[Enable compression](#) for the following resources to reduce their transfer size by 247.8KiB (73% reduction).

- Compressing <https://www.kryptex.org/static/v2/img/cards.svg> could save 59.9KiB (77% reduction).
- Compressing <https://www.kryptex.org/static/v2/img/earn3.svg> could save 56.5KiB (72% reduction).
- Compressing <https://www.kryptex.org/static/v2/img/earn2.svg> could save 40.4KiB (72% reduction).
- Compressing <https://www.kryptex.org/static/v2/img/earn1.svg> could save 35KiB (72% reduction).

Mobile

- Compressing <https://www.kryptex.org/static/v2/img/home-illustration.svg> could save 26.3KiB (76% reduction).
- Compressing <https://www.kryptex.org/static/v2/svg-sprite.svg> could save 15.9KiB (62% reduction).
- Compressing <https://www.kryptex.org/static/v2/img/kryptex-logo-light.svg> could save 11.3KiB (82% reduction).
- Compressing <https://www.kryptex.org/static/v2/img/pattern-bg.svg> could save 2.5KiB (54% reduction).

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 2 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Optimize CSS Delivery](#) of the following:

- <https://www.kryptex.org/static/v2/styles.css?v=2.1>
- <https://fonts.googleapis.com/css?family=Montserrat:300,400,500,600,700&subset=cyrillic>

Consider Fixing:

Avoid landing page redirects

Your page has 2 redirects. Redirects introduce additional delays before the page can be loaded.

[Avoid landing page redirects](#) for the following chain of redirected URLs.

- <http://kryptex.org/>
- <https://www.kryptex.org/>

Mobile

- <https://www.kryptex.org/en/>

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- <https://www.kryptex.org/static/v2/img/kryptex-overview-en.png> (expiration not specified)
- <https://www.googletagmanager.com/gtm.js?id=GTM-KF8WWM5> (15 minutes)
- https://connect.facebook.net/en_US/fbevents.js (20 minutes)
- <https://connect.facebook.net/signals/config/241850522927872?v=2.8.42&r=stable> (20 minutes)
- <https://mc.yandex.ru/metrika/advert.gif> (60 minutes)
- <https://mc.yandex.ru/metrika/watch.js> (60 minutes)
- <https://www.google-analytics.com/analytics.js> (2 hours)

Minify HTML

Compacting HTML code, including any inline JavaScript and CSS contained in it, can save many bytes of data and speed up download and parse times.

[Minify HTML](#) for the following resources to reduce their size by 627B (11% reduction).

- Minifying <https://www.kryptex.org/en/> could save 627B (11% reduction) after compression.

Optimize images

Mobile

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 17.9KiB (20% reduction).

- Compressing <https://www.kryptex.org/static/v2/img/kryptex-overview-en.png> could save 17.9KiB (20% reduction).
